

Battery Recycling Project

Environmental Club – NHS

Why We Do It:

When batteries are left in landfills, chemicals can leak from them and pollute soil and water. Recycling batteries is good for the environment and provides the E-Club with funds.

How To Help:

Save your old batteries and send them to school for collection. They will be picked up by members of the Environmental Club every 1st Wednesday of the month and brought to City Hall for recycling!

We Collect:

- Any household batteries
- Button batteries
- And more!
