

We understand that all students learn differently and having an organized, predictable space is a good place to start. Here are some possible tips for making the best functional learning space for students at home and setting them up for success.

**The environment**

Designated learning space

- Desk, kitchen counter/table, dining room table, clipboard etc.
- Free from distractions/away from television, noisy areas, toys, games etc.

Visual Schedule

- This can help your child to know when things will come to an end
- Refer to your child's seesaw/google classroom/teacher for an exact daily schedule
  - See below for examples

Built in breaks

- Although teachers are providing movement breaks, built in breaks can be helpful to break-up your child's schedule throughout the day & help them be more motivated. Some examples include:
  - Extra snack
  - Time to play with favorite toy, legos, stuffed animal etc
  - Color or draw
  - Short walk outside

All materials are accessible and ready for the day

- Chrome book charged and logged in, pencils ready and sharpened, drawing tools, printables, folders
